## UNIVERSITY OF WASHINGTON Tribal Renewable Energy Research Workshop

MAY 11-13, 2010

University of Washington Husky Union Building  
Seattle, Washington

The time is right to explore new research questions that can be developed through partnerships between tribal communities and the renewable energy research community. This workshop seeks to unite tribal and academic leaders from across North America to define mutual goals for collaboration that will advance the scholarship and application of renewable energy and its productive interactions with landscapes. The meeting will produce a research roadmap for Tribal-University collaborations in renewable energy.

### WORKSHOP SPONSORS

National Science Foundation and University of Washington

*Held in conjunction with Tribal Leadership Summit May 14, 2010*

### TUESDAY EVENING, MAY 11

Reception

### WEDNESDAY, MAY 12

National tribal leaders, government representatives and policy specialists present on *Renewable Energy Research and Tribes—An Overview of What's Happening Now*

### THURSDAY, MAY 13

Academic leaders kick off sessions with a look at state-of-the art in research in specific areas of renewable energy. Audience participation in discussions will be encouraged by appointed facilitators.

- Land and Water Use
- Solar
- Wind
- Tidal/Wave
- Bioenergy
- Carbon Markets

### FRIDAY, MAY 14

Tribal Leadership Summit—tribal leaders will hear the outcomes of the workshop and comment

### REGISTRATION INFORMATION

A link to registration materials will be available through the site [bioenergy.washington.edu](http://bioenergy.washington.edu)
